Revolving KARUSSEL: Saves space

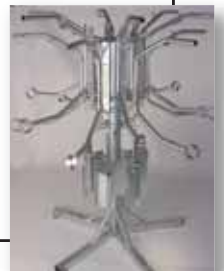

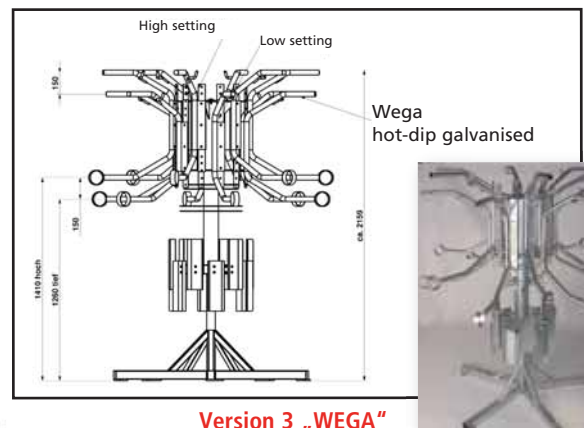

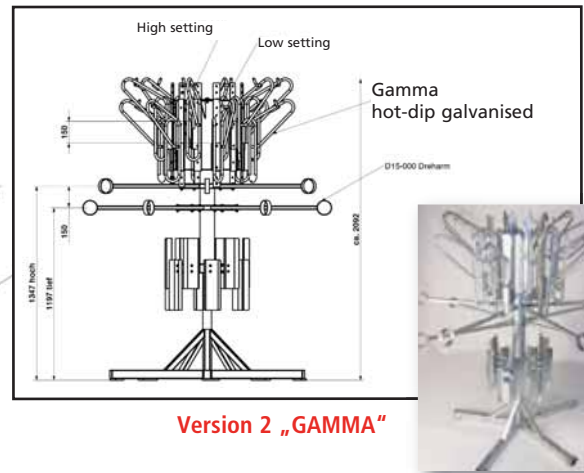

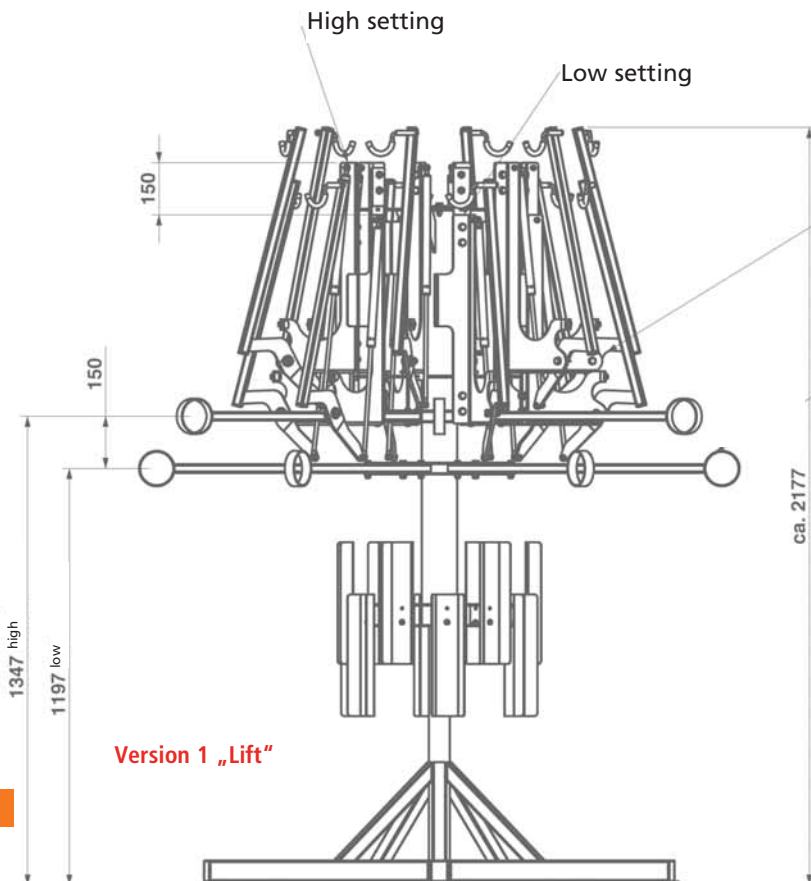

Open frame in loading position ... Hook the front wheel ...

Activate the pneumatic spring ...

Per KARUSSELL 12 bike suspension units

Considering how the KARUSSELL's are equipped, choose between: **1. LIFT**, the convenient bike parker with power thanks to the integrated pneumatic spring. **2. GAMMA**, the bicycle parker developed together with the German Railway (Deutsche Bahn). **3. WEGA**, the all-purpose talent. Selecting 1. is a choice for comfort; the pneumatic spring does all the work. When selecting 2. or 3. The bike is lifted into the hanging position by using your own strength.

and puts things in order!

The spring pulls the bike into a vertical position ...

Lock up your bike!

Please tick the brochures you are interested in:

- A** Roofing systems with design options: configurable in modules with, depending on customer wishes, the same or diverse original dimensions that are compatible with one another. Flexible construction for your unique off-the-rack item.
- B** Bicycle parking system with high function and design requirements. The result is an optimal price-performance ratio.
- C** Would you like all the information on a CD-ROM? Ask for it here!
- D** Function-optimised bicycle parker, in part with ADFC recommendation, with style and a finished look.
- E** Polyglot city furnishing: The export brochure in 3 languages
- F** Comfortable bench systems: seating surface made from wood or wire lattice
- G** Waste containers: From "functional" to "stylish"
- H** Quo vadis public transportation
- I** Vertical steel in modern design
- J** PARK DESIGN in stainless steel: Valuable and maintenance-free
- K** Stable frames for tree protection, pavement borders or bike stands (support stands)
- L** Variable system rooms with sound insulation
- M** About us
- N** Inside & outside: everything relating to your house
